

Front-end developer for Shape

🔖 Save job

Do you want to build web applications for a recognized business? Do you share a passion for mobile products, and are you motivated to have the chance to advance and grow your career every day? Get the opportunity to join the fascinating journey of Shape among like-minded enthusiasts!

About the role

On behalf of Shape, Academic Work is looking for a front-end developer to join their Copenhagen office. Shape is known for building high quality mobile products that tackle real problems and push the business forward – apps you might have stumbled upon before like Red Bull, IKEA Place, Nordisk Film, Oddset, Fitness World, Magasin, OK, Aarstiderne, etc.

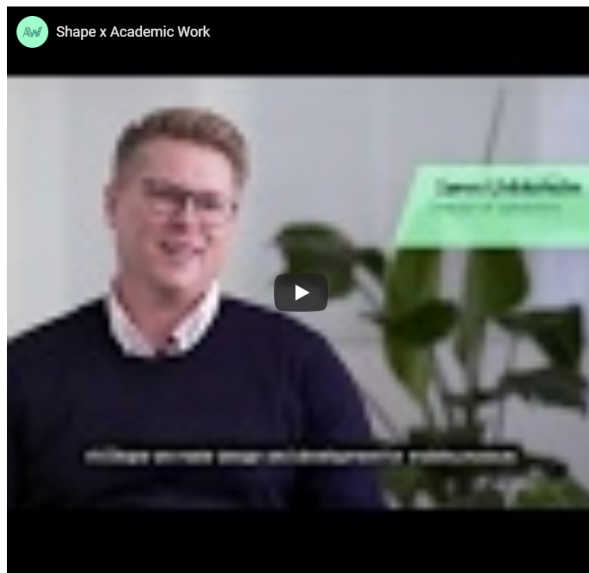

Shape wants to continue their growth and is looking for you to join their team. This is an excellent opportunity for you who wants to combine your existing skills and passion for mobile products – while still improving your profile alongside your talented colleagues. Your opinions, thoughts, and the eagerness to share knowledge and skills are appreciated – and you will always find a colleague who wants to talk about the newest technology with you.

What can Shape offer you?

- A salary matching the market and your qualifications
- Responsibility and flexibility to make your own decisions
- The possibility to develop your career every day – starting with a Mentor program, where you will be linked with an experienced Developer – and a continuous talk about your skills, interest, goals, etc. with your Team Lead
- A flat hierarchy with colleagues and leaders who share the same passion for coding
- Social events, keynotes, events where the newest technology is being discussed, Fifa tournaments, morning runs at Islands Brygge, Friday Bars, board game nights, Family LEGO days – and the famous Shape Weekend where everyone pauses their daily projects and retrieve to a remote location where hacking and socializing are on the agenda
- The ability to work with experienced and passionate developers from 14 different countries

But how is it really to work for Shape?

"At Shape you will get a plethora of opportunities to grow as a person and as a developer. Your responsibilities grow in your pace and the social unity between everyone is very unique." – Oliver.
"Just a cool place to hang out and write awesome code" – Casper.

Job duties

As a front-end developer at Shape, you will work mainly on building web applications. The projects that you will be working on influence millions of people all around the world. You will be challenged, you will have the opportunity to impress every day, and you will get the respect you deserve. Your range of tasks can involve more client contact, depending on your interest, skills, and where you are in your career.

We are looking for

- You have a background in building web applications and proficiency in React or another front-end framework.
- You have advanced knowledge and understanding of JavaScript and ES6. Possibly also TypeScript?
- You are experienced with server-side technologies, server-side rendering and API design
- You have a proficient understanding of cross-browser compatibility issues and ways to work around such issues.

Client information

Shape believes that the effective interplay between design and functionality is what sets their work apart from other agencies. They are transparent with their customers, and because they consider their projects to be their own, the results are beautiful, useful, and rock solid. Rooted in a European work ethic, all of their work is done from their studio in the heart of Copenhagen. This allows us greater control over their output, as well as the ability to create a true family atmosphere with their team and clients. Want to read more about Shape?
